

Learning for sustainability in Europe: Building competences and supporting teachers and schools

All school curricula in Europe include sustainability, but not all competences are equally covered

Which subjects include sustainability competences most often?

Learning for sustainability in Europe: Building competences and supporting teachers and schools

Sustainability is not always included in regulations for teacher education and training

In many education systems teachers receive different types of support to deliver sustainability education

Learning for sustainability in Europe: Building competences and supporting teachers and schools

Whole-school approaches to sustainability are widely supported by education systems, but monitoring is rare

Less than a third of education systems invest in small-scale school infrastructure for sustainability

Financial support for

Learning for sustainability in Europe
